

Ontario's Municipal Building Departments are **CUTTING RED TAPE**

FOR OUR PARTNERS AND THE PUBLIC

1 **Consistency**

We are working together to improve consistency in service delivery across Ontario municipalities.

2 **E-permitting**

We are consulting with our professional partners and each other to establish the best way to transition from paper-based applications to an online process.

3 **Better applications**

We are finding ways to ensure that builders and the public provide the required documentation in their initial building applications, to get it right the first time.
